

CAMEL JET 1600

HIGH-PRESSURE WATER JETTING SYSTEM

A VALUABLE ADDITION TO ANY FLEET.

Super Products' Camel Jet® 1600 is the perfect truck-mounted, high-pressure water jetting system for keeping municipal sewers, sanitary and storm sewer lines, laterals, and drainage lines clean and free flowing.

In addition to offering continuous flow up to 80 GPM and pressure up to 2000 PSI for maximum performance, our Camel Jet 1600 offers many features that make the unit easy to use and increases its capabilities.

The Camel Jet utilizes three modular tanks to carry up to 1,600 gallons of water. And the tanks are formed of rotationally-molded polyethylene with ultra violet stabilizers to eliminate repair cost often associated with metal tanks. For additional safety, a Lexan® Containment System helps protect the operator from hose rupture or high-pressure water.

800.837.9711 • www.superproductscorp.com

Available with either a front or rear-mounted 180° rotating hose reel with patented containment system, Camel Jet units also offer convenient access to major components for quick and easy maintenance.

STANDARD WATER TANK SYSTEM

- Capacity – 1,600 US gallons (6,056.7L)
- Three tank modular self-baffle design
- Rotational-molded polyethylene
- Anti-syphon air gap protection
- Curbside fill 2 1/2" (63.5mm)
- Inspection ports
- Water level sight tube
- Tank drain

HIGH PRESSURE WATER SYSTEM

- Heavy-duty Triplex continuous flow water pumps
- 65 GPM (246.1LPM) at 2000 PSI (138 Bars) – *standard*
- 80 GPM (302.8LPM) at 2000 PSI (138 Bars) – *optional*
- In-line strainer
- Washdown gun/connection
- Relief valve/rebuildable

POWER DRIVE SYSTEMS

- 10-bolt hot shift PTO-belt drive
- Split shaft transfer case-belt drive

CONTROLS AND GAUGES

- Water pump PTO – on/off
- Water pressure gauge
- Engine throttle – adjustable
- Reel speed control
- Water flow control valve

HOSE REEL ASSEMBLY

- Rear or front fixed
- Level wind – manual
- 1000' (304.8 m) capacity
- Dual chain drive
- Containment shield
- Hydraulic pressure gauge

NOTE: Sewer hose not included

STANDARD ACCESSORIES

- Operation, parts and service CD
- Full length tool trays
- Rear mud flaps
- Painted white enamel color
- Lights and reflectors

OPTIONS

- Rear or front-mounted 180° rotating hose reel
- Cold weather recirculation
- Digital footage counter
- Sewer hose
- Air purge system
- Variable flow water system
- Low water warning light alarm
- Tigertail hose guide
- Tank strainer
- Tool boxes
- LED arrow board
- LED strobe lights
- LED light package
- Auto hose level wind

NOTE: Contact factory for additional available options
