Super Products

When ordering parts, always have the unit serial number of your truck available.

This is where you can find your serial number:

Supersucker®	1992 – Current	Bottom front of forward most LH clean-out door frame.
	Pre – 1992	Below main control panel on support tubing

Camel®	1983 – Current	LH side of the power frame on horizontal tube towards front
	Pre – 1983	LH side of power frame on front face of vertical angle

---

Mud Dog®	All years	Forward LH edge of water tank tray

All serial numbers are either eight or nine digits long, depending on the unit type.
The serial number denotes several characteristics as indicated:

Example: S/N 02011537 is a Model 5227 Supersucker®
Built in 2002 and is unit 1537.

S/N	0 2	0 1	1 5 3 7
	Year of Production	Model Produced	Unit Number

The third and fourth (and sometimes the fifth) digits of the unit serial number indicate which model is produced and which vacuum pump is used.
