

SUPERSUCKER® - Heavy Duty Sewer Cleaner

SUPERSUCKER®
Brand of Vacuum Loaders & Cleaners

The Supersucker® heavy-duty sewer cleaner offers state of the art vacuum technology and modular design to provide heavy duty vacuum efficiency and outstanding performance in cleaning sewers.

The rear mounted hose reel is hydraulically driven with a capacity of 800' of 1" hose. Features include 180° manual rotation with brake, double chain drive, hose level wind and a safety shield.

Tube storage is located on the curb side of the unit making accessibility safe and convenient.

Note – Not all items shown are standard equipment.

The Supersucker is manufactured under one or more of the following U.S. Patents: 3,885,932; 3,973,935; 4,155,586; 4,103,841; 4,068,824; 4,322,868; 4,134,174; 4,151,688; 4,222,404; 4,944,258; 5,042,515; 5,141,528. Patented in other countries. Other patents pending.

SUPERSUCKER® - Heavy Duty Sewer Cleaner

General Specifications

Super Products has combined the heavy duty design of the Supersucker® with the high pressure water jetting system of the Camel® sewer cleaner, resulting in a heavy duty industrial vacuum loader/sewer cleaner that can be used for sanitary sewers, storm sewers as well as numerous other applications.

Vacuum System

Vacuum Pump: Rotary lobe positive displacement pumps with ductile iron impellers and high temperature seals.
CFM: Various Models – up to 6000 CFM
Vacuum: 0-28" Hg optional
Drive: Heavy-duty transfer case

Boom

8" hydraulic boom with 5' telescopic section. Controls at operator station with handheld pendant available.

Air Filtration System

Liquid shut off – 14" stainless steel float ball.
Separator – Single large separator with large access door at bottom for quick removal of material.

Water System

Triplex water pump rated at 65 or 80 gpm and 2000 psi. Water pump is hydraulically driven from truck engine with capability to adjust flow, independent of vacuum pump. Heavy duty adjustable pressure regulator. "Y" strainer with shutoff valve. 1200 or 1500 gallon water tank. Handgun with 25' of hose. 15° and 35° nozzles with extension are standard. Air purge and recirculation system are standard.

Collector Body

Capacity: 15 cubic yards.
Material: 1/4" or thicker steel used throughout entire body.
Body Dump: One heavy-duty telescopic double acting cylinder provides a 51° dump angle. The body and separator chamber are hydraulically raised together but empty independent of each other.
Tailgate: Full opening tailgate with two lift cylinders. The patented hydraulic tailgate latching system is liquid tight and prevents leakage in case of hydraulic malfunction. Latches and hinges are fully adjustable. 6" drain valve with hose is standard.
Warranty: One year parts against defects in materials or workmanship. Consult Super Products for complete warranty information.

SPECIFICATIONS		
Payload Capacity	15 cu. yd.	11.46 cu. m.
Overall Length (OAL) approximate	37'	11.28 meter
Overall Height Above Ground (OAH) approx.	13'	3.96 meter
Overall Width (OAW) approximate	8' 0"	2.44 meter
RECOMMENDED TRUCK CHASSIS SPECIFICATIONS		
Type	Conventional Cab 6 x 4	
CA / AF	Consult Factory	
RBM – Minimum	3,000,000	
GVWR	Consult Factory	
Exhaust	Vertical Muffler and Pipe - Passenger Side	
Engine	Consult Factory	
Transmission	Manual or Automatic	
Air Compressor	13.2 CFM Minimum	

AVAILABLE OPTIONS

- Alarm Packages with Safety Shut-Down
- Block buster valve
- Body Flush Out Systems
- Stainless Steel Components
- Debris Tank Vibrator
- Worklights
- Vacuum Tube and Accessories
- Flashing Arrow Boards
- Antifreeze Injection
- Baghouse(s)
- Various Nozzles and Root Cutters
- Sewer Hose
- Hose Counter
- Rear Splash Shield
- Tool Box
- Decant Valves
- Drain Valves
- Top Safety Railing
- Sludge Pump
- Gauge Packages
