

## Supersucker® with Sound Suppression

Supersuckers® with the sound suppression package offer greatly reduced sound levels for the workplace environment. Sound suppression material has been strategically incorporated onto the Supersucker unit to achieve low sound levels at all operating ranges.

- This unit utilizes a 6000 cfm/28" hg vacuum pump along with our standard heavy duty transfer case. Both of these key components are made in the USA and offer superior dependability and performance.
- Access doors for maintenance have been incorporated into the sound attenuation system to access required areas.
- Lightweight materials are utilized in the design of this system to help keep the payload of the unit at its normal high level.
- Due to the compact design, all Supersuckers® with Sound Suppression are able to incorporate most all available Supersucker® options.

**Note** – Not all items shown are standard equipment.

**Note** – Not all items shown are standard equipment.

**Advantages:**

- Lower noise levels on all jobs
- Offers your employees and customers a quieter work environment
- 6000 cfm and 28” hg rated vacuum
- Ideal when sound suppression is required per job
- Expands job contract possibilities
- Does not increase the length of the unit
- Easily removed if required
